CHANGES IN THE ORGANIC MATERIAL IN LAKES IN THE BLAST ZONE OF MOUNT ST. HELENS, WASHINGTON: USGS CIRCULAR 850-L

To get **Changes in the Organic Material in Lakes in the Blast Zone of Mount St. Helens, Washington: Usgs Circular 850-L** eBook, you should access the web link under and save the document or have accessibility to additional information that are highly relevant to **CHANGES IN THE ORGANIC MATERIAL IN LAKES IN THE BLAST ZONE OF MOUNT ST. HELENS, WASHINGTON: USGS CIRCULAR 850-L** ebook.

Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.During several periods of volcanic-ash eruption at Mount St. Helens, Wash., (March 30, May 25-26, May 30-June 2, and June 12-13, 1980) strong winds from the north occurred at high altitudes. As a result, the volcanic ash fell some 50 miles to the south in the Bull Run watershed, the principal water-supply source for the metropolitan area of Portland, Oreg. Water samples collected from three stream sites within the watershed were compared with samples collected during the same season in previous years. No detectable changes were noted in chemical characteristics. Precipitation samples collected immediately after the June 12-13 ash fall ranged in specific conductance from 20 to 41 micromhos per centimeter at 25C and in pH from 4.0 to 4.3 pH units. Stream samples collected during the May-June period ranged in specific conductance from 18 to 28 micromhos per centimeter at 25C and in pH from 6.7 to 7.5 pH units. Volcanic-ash samples were collected and analyzed for particle size, chemical composition, and weight. Significant differences in particle size of ash were found in samples from two separate eruptions.
